

# Spell With Your Fingers

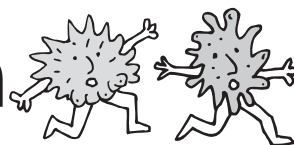

You can use Sign language to spell your name. Look for the signs for the letters of your name and circle them. Then practice shaping your fingers to spell the letters. Can you spell Mom or Dad? What does a friend's name look like? Try it!

What do these signs remind you to do? Write the letter for each sign to find out.

## Help Children Learn

Young children love to use their hands for everything! They are particularly fascinated with learning sign language as a hands-on way to communicate. Use this alphabet to help children learn how to finger spell important names and words. You will be reinforcing essential literacy skills that help children learn how to read and write.
